The Montana Water Supply Outlook is a publication of the U.S. Soil Conservation Service. The SCS administers the Cooperative Snow Survey Program in cooperation with other federal, state and private agencies, organizations, and individuals.

The report is prepared by SCS, Snow Survey and Water Supply Forecast Staff, Room 443, Federal Building, 10 East Babcock, Bozeman, Montana.

FEDERAL STATE PRIVATE
COOPERATIVE SNOW SURVEYS
Furnishes the basic data necessary for forecasting water supply for irrigation, domestic and municipal water supply, hydro electric power generation, navigation, mining and industry
"The Conservation of Water begins with the Snow Survey"

****

Snowmelt increases with warmer temperatures!

Snow surveys and SNOTEL reports indicate the water content in most snowpacks continued to increase almost to mid-May. Melt would occur for a few days and then additonal snowfall would increase the snowpacks. Low elevation snow in southwest Montana and near Red Lodge, left from the large storm near the end of April, persisted for the first week or two in May.

Near mid-month, warm temperatures throughout the higher elevations of southern Montana caused large snowmelt rates. In southwestern Montana, rainfall accompanied this large snowmelt and produced considerable runoff. Preliminary reports indicate the Ruby River produced peak flows nearly twice as large as any previously measured above Ruby Reservoir.

Most areas in the state received good moisture for the first half of May. The southern part of the state continues to have near to above average snowpacks while those remaining in the northern part are below average.

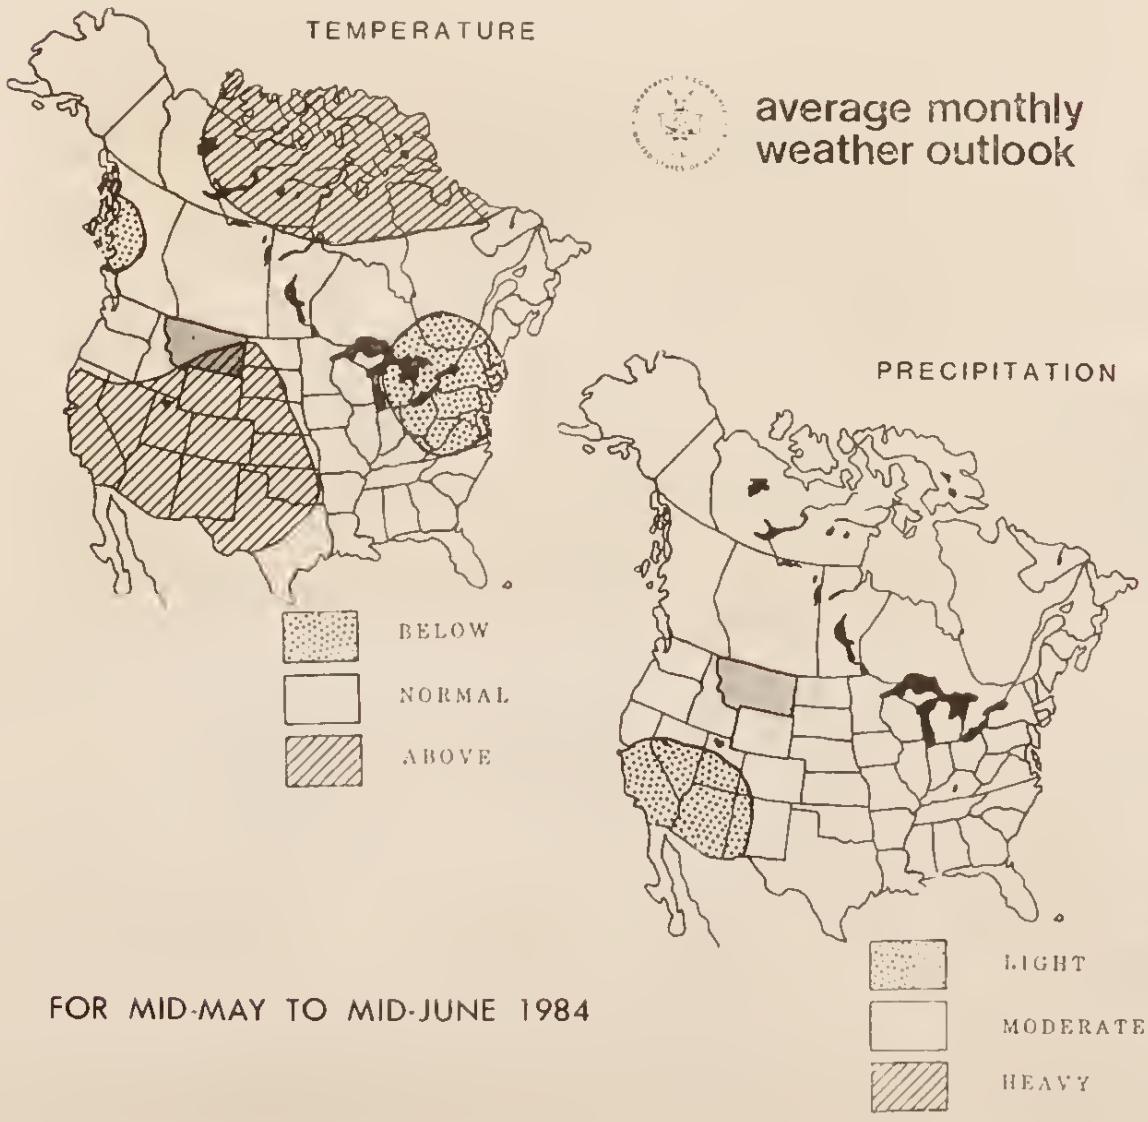
Based on present snowpack, the peak snowmelt runoff is expected to come in late may to mid-June on most major streams.

In the Missouri River drainage, the Big Hole River is expected to reach its snowmelt peak runoff in early June. The Madison River inflow to Hebgen Lake is expected to peak near the end of May or in early June. The Gallatin River is still forecast to have peak snowmelt runoff around mid-June. Inflow to Canyon Ferry Reservoir should peak the first or second week in June. Even though the Ruby River has had a major peak of record, it is expected that another secondary snowmelt peak will occur in early June.

Peak snowmelt runoff in the Yellowstone River drainage should occur around mid-June on most streams.

West of the Divide, most streams in the Clark Fork and Flathead drainages are expected to reach their snowmelt peaks in late May. The Bitterroot River could peak in late May or early June.

average monthly weather outlook



FOR MID-MAY TO MID-JUNE 1984

AGENCIES AND ORGANIZATIONS COOPERATING IN MONTANA SNOW SURVEYS

GOVERNMENT AGENCIES
- Canada
  - Department of the Environment
    - Atmospheric Environment Service
    - Water Management Service
  - British Columbia Ministry of Environment
    - Inventory and Engineering Branch, Hydrology Section
  - Alberta Environment
    - Technical Services Division
- Federal
  - Department of the Army - Corps of Engineers
  - Department of Agriculture - Forest Service
  - Department of Agriculture - Soil Conservation Service
  - Department of Commerce - National Environmental Satellite Service
  - Department of Commerce - National Weather Service
  - Department of Interior - Bureau of Indian Affairs
  - Department of Interior - Fish and Wildlife Service
  - Department of Interior - Geological Survey
  - Department of Interior - National Park Service
  - Department of Interior - Bureau of Reclamation
  - Department of Energy - Bonneville Power Administration

STATE AGENCIES
- Montana Conservation Districts
- Montana Department of Fish, Wildlife and Parks
- Montana Department of Natural Resources and Conservation
- Montana State University - Agricultural Experiment Station
- University of Montana - School of Forestry

PRIVATE ORGANIZATIONS
- The Anaconda Company
- Big Sky of Montana
- Butte Water Company
- Flathead Valley Community College
- Montana Power Company
- Pondera County Canal & Reservoir Company

Other organizations and individuals furnish valuable information for snow survey reports. Their cooperation is gratefully acknowledged.

SNOW SURVEY DATA
